

Advance notice

ETI Seminar

ETI seminars provide information and guidance on topical issues for members and others with an interest in ethical trade.

ETI Risk Assessment Project Methodology and lessons

Background

The ETI Risk Assessment project aimed to test and improve a one-day, one-person, single site risk assessment process that looks at the gap between labour practice and compliance with the standards in the ETI Base Code. The project also aimed to establish the circumstances under which the use of this process is credible. The main output of the project is a full Toolkit for the assessment process.

Objectives

This seminar will launch the toolkit developed as well as presenting the process followed and lessons learnt through participating in the project.

The seminar will provide participants with:

- a summary of the different aspects of the toolkit
- an understanding of the conditions and limits under which the methodology is considered to be effective
- an understanding of the main issues raised and lessons learnt by those participating in the project

Speakers

David Croft, Head of Co-op Brand and Technical, CWS

Simon Steyne, International Officer, TUC
